

## CybTouch 8

## CybTouch 8P For Press Brakes

### The Intuitive Programming

As CybTouch's range entry model, CybTouch 8P is designed specifically for conventional (torsion bar) 2 or 3 axes press brakes.

The very intuitive interface of CybTouch 8P is displayed on a bright color touch screen, which is housed in a sleek and modern housing or can optionally be delivered as a robust panel ; all this at a competitive price.

Thanks to its large keys, online help, simplified software and many other automatic functions that constantly guide the operator, CybTouch 8P is as simple as a positioner control.

## Easy Operating

- High-contrast touchscreen, with vivid colors.
- Simple pages, clear display, large keys.
- Intuitive and user-friendly interface.
- Complete programming for efficient mass-production with multiple bends.
- Easy single bends with the EasyBend page.
- Online help and interactive warning pop-up.
- Comfortable wireless software updating and data backup using PC or Notebook.
- USB memory stick port for data transfer / backup.
- Available in many languages.

## Better Bending

- Various automatic calculations of bend functions.
- Bending sequences and programs can be memorized.
- Offline PC-based CybTouch Simulator.
- Angle, pressure and crowning management.
- Easy manual movement.

## Powerful

- Bend allowance calculation.
- Pressure – crowning calculation.
- Modulable tools for each part or bend.
- Punch depth calculation.
- Angle and back gauge correction.

## 2 models

- 2 axes (Y, X)
- 3 axes (Y, X, R)
- Available in housing or panel design

Easy operating, better bending and powerful features all characterize CybTouch 8P
