

# VisiTouch CNC

## Intuitive Programming

VisiTouch CNC is an outstanding numerical control for multi-axes Machine-Tools with a new solution all-in-one:

- Full Touch-screen CNC.
- Full digital Numerical control with EtherCAT<sup>®</sup> and CANopen<sup>®</sup> interface.
- Multi-channels architecture.
- Unique programming experience thanks to its modern and friendly HMI
- Interface to all kind of external common market systems.
- It can manage simple up to most sophisticated Machine-Tools.
- VisiTouch CNC offers also an open system allowing high customization.
- Running under Windows 10 for multitasking and networking.

## Main features for the user

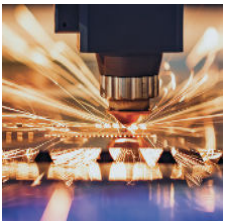

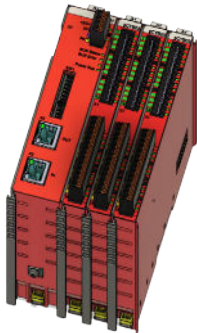

- Modern streamlined glass surface touch screen.
- User friendly HMI, thanks to intuitive programming.
- Most highest precision thanks to sophisticated algorithms (developed especially for the Swiss watch industry quality).
- Industry 4.0 ready.
- Remote control.
- Remote alarms.

## Main features for the OEM

- All kinematics available.
- Fast inter-operation, optimized movements.
- Axis calibration (correction table)
- Probing cycles
- Tool life management
- Tool measurement
- Tool changer in hidden time
- Plugin architecture to implement specific functionalities including customized HMI interface and dedicated cycles
