

CybTouch 8

CybTouch 8P For Press Brakes

Intuitive Programming

CybTouch 8P is designed specifically for conventional (torsion bar) 2 or 3 axes press brakes.

As part of the CybTouch range, it has an intuitive and vivid color touch screen and a high integration of functions.

Thanks to its interactive touch software interface with large keys, on-line help, and many other automatic functions to constantly guide the operator, CybTouch 8P is as simple as a positioner control.

CybTouch 8P is integrated into a sleek and modern housing specially designed to be attached to a swiveling arm, or can optionally also be delivered as a robust panel.

Easy Operating

- High-contrast touchscreen, with vivid colors.
- Simple pages, clear display, large keys.
- Intuitive and user-friendly interface.
- Complete programming for efficient mass-production with multiple bends.
- Easy single bends with the EasyBend page.
- Online help and interactive warning pop-up.
- Comfortable wireless software updating and data backup using PC or Notebook.
- USB memory stick port for data transfer / backup.
- Available in many languages.

Better Bending

- Various automatic calculations of bend functions.
- Bending sequences and programs can be memorized.
- Offline PC-based CybTouch Simulator.
- Angle, pressure and crowning management.
- Easy manual movement.

Powerful

- Bend allowance calculation.
- Pressure – crowning calculation.
- Modulable tools for each part or bend.
- Punch depth calculation.
- Angle and back gauge correction.

2 models

- 2 axes (Y, X)
- 3 axes (Y, X, R)
- Available in housing or panel design

Easy operating, better bending and powerful features all characterize CybTouch 8P
